**HOW IT WORKS**

[Insert brand name] (Glyphosate) enters plants through the foliage and moves systemically to the roots. Glyphosate kills the weeds by stopping the function of an essential enzyme found in plants (but not humans or animals). Weeds die, roots and all. Kills only what you spray. (Any) Product not absorbed by plant breaks down without moving in or on the soil to untreated plants. Weeds will begin browning and/or (yellow and) wilt within (within (3)(6)(#) hours) hours with complete kill in 1 to 2 weeks. (Diquat, the second active ingredient, enters the plant causing weeds to brown then yellow and wilt within 6 hours with complete kill in 1 to 2 weeks.)

**WHERE TO USE**

- On patios, walkways, & driveways, (gravel, or mulch beds)
- In (Around) flower beds
- Around shrubs & trees
